C.O.F

HUMATE BASED

“COMPLETE ORGANIC FERTILISER”

Product Description

C.O.F contains only natural forms of nutrients. These ensure that the plant receives a balanced diet of essential nutrients, as well as delivering high levels of humates to improve the structure and performance of the soil. C.O.F is an easily applied granulated fertiliser made from magnesite, reactive phosphate rock, gypsum, humates, lime, bentonite, potassium sulphate, nitrified coal and elemental sulphur. C.O.F is a powerful slow release fertiliser and not a soil conditioner or manure based treatment.

C.O.F is a premium product manufactured from the best available ingredients to ensure the user gets optimum results.

C.O.F can be used at any time during the growing season on cool, warm or transitional grasses, garden beds, vegetables etc.

C.O.F can benefit your turf and plants by helping to:

- **Reduce sodium levels**
- **Improve water retention**
- **Stimulate seed germination**
- **Reduce soil compaction**
- **Increase rhizobium activity**
- **Improve water drainage in damp areas**
- **Encourage root development**
- **Add humus to the soil**

Pack sizes:

**3 kg & 10 kg buckets,
25 kg bags & 1 tonne bulk bags.**

What are Humates?

Humus is derived from the breakdown, under the right bacterial conditions of organic matter, whose origins have come from decomposed vegetation. Humus is a valuable source of Humic Acid. The salts of Humic Acid are known as Humates. It is increasingly recognised that Humates, as the active ingredient in the soils organic matter, play a critical role in the soil's fertility as they hold nutrients and release them over time, as the turf plant requires them.

Suggested Application Rates

Situation	Rate
Established Turf :	3 – 4 kg/100m ²
Turf Starter:	5 - 6 kg/100m ²
Roses:	Every 2 months
Fruit trees:	Apply around drip line
Vegetables:	Apply at planting, then monthly

Minimum Analysis

Nitrogen (N)	3.2% W/W
as natural organic compound...	3.2%
Phosphorous (P)	3.2% W/W
as citrate soluble.....	3.2%
Potassium (K) total as sulphate..	3.3% W/W
Sulphur (S)	
as natural organic compound.....	10%
Calcium(Ca) as carbonate	13.0%
Magnesium (Mg)	2.6%
