CONTROL NK

20-0-20

CONTROLLED RELEASE LIQUID FOLIAR FERTILISER.
85% NITROGEN AS SLOW RELEASE.

Product Description

Control NK is a balanced nitrogen/potassium analysis for balanced feeding without phosphorous.

Control NK is a premium product manufactured from the best available ingredients to ensure the user gets optimum results.

Control NK can be used at any time during the growing season on cool, warm or transitional grasses.

Control NK contains 85% slow release nitrogen with an extremely low salt index developed to supplement or replace standard soil fertility programs. Because this product can be used as a foliar nitrogen source, the amount of soil-applied nitrogen can be reduced, thus increasing losses from nitrate leaching and volatilisation.

Control NK is very effective in increasing and maintaining turf vigour and colour.

- Up to 8 weeks release.
- Compatible with most pesticides.
- Suitable for all types of spray equipment.
- Nitrogen derived from methylene urea.
- Potassium derived from organic potassium nitrate.
- Non-abrasive to spray equipment.
- Chloride free.

Pack sizes: 20lt & 200lt.

Suggested Application Rates

| Situation | Rate |
|------------------------------------|-------------------------------|
| General Turf | 300-600 mls/100m ² |
| Standard bowling green 37 x 37m | 4.2-8.4 Litres |

Comments

Minimum dilution rate 1:25. Do not apply during the heat of the day. Do not apply if turf is under heavy stress from heat or inadequate moisture levels. Can be applied at up to 1200 mls/100m². Can be mixed with most commonly used chemicals. Before mixing with other products, mix a small amount and check for fallout or any adverse reaction.

Always read the product label for rates and safety directions.

Minimum Analysis

Total Nitrogen (N).....20% W/V
15% as urea
85% as slowly available
water-soluble nitrogen from methylene
urea

Total Potassium (K)
as potassium citrate.....20% W/V
