IRONTRACE

LIQUID CHELATED TRACE ELEMENT

Product Description

Irontrace is a fully soluble chelated form of iron to ensure rapid absorption. This product is compatible with most micronutrient and pesticide mixes.

Irontrace helps maintain turf colour and is an activator for several enzyme systems.

Irontrace is a premium product manufactured from the best available ingredients to ensure the user gets optimum results.

Irontrace can be used at any time during the growing season on cool, warm or transitional grasses.

- **Compatible with most pesticides.**
- **Suitable for all types of spray equipment.**
- **Non-abrasive to spray equipment.**
- **Essential for chlorophyll production.**

Pack sizes: 20lt & 200lt.

Suggested Application Rates

Situation	Rate
General Turf	100-400 mls/100m ²
Standard bowling green 37 x 37m	1.4-5.6 Litres

Comments

Minimum dilution rate 1:100.

Do not apply during the heat of the day. Do not apply if turf is under heavy stress from heat or inadequate moisture levels. Do not spray to run-off.

Can be mixed with most commonly used chemicals.

Before mixing with other products, mix a small amount and check for fallout or any adverse reaction.

Always read the product label for rates and safety instructions.

Minimum Analysis

Total Iron (Fe).....5% W/V

Sulphur (S).....2.9%W/V
