# K CARBONATE

## 0-0-41.5

POTASSIUM CARBONATE SOLUTION

## Product Description

**K Carbonate** is a highly concentrated form of potassium carbonate. This product has a very low salt index.

**K Carbonate** helps strengthen turf grass over high stress periods. It is commonly used over the months leading up to hot and dry weather.

**K Carbonate** is a premium product manufactured from the best available ingredients to ensure the user gets optimum results.

**K Carbonate** can be used at any time during the growing season on cool, warm or transitional grasses.

- **Compatible with most pesticides.**
- **Suitable for all types of spray equipment.**
- **Potassium in the form of carbonate.**
- **Non-abrasive to spray equipment.**
- **Chloride free.**
- **Low pH (10.5)**

**Pack sizes: 20lt & 200lt.**

## Suggested Application Rates

Situation	Rate
General Turf	200-300 mls/100m <sup>2</sup>
Standard bowling green 37 x 37m	2.8-4.2 Litres

## Comments

Minimum dilution rate 1:100.

Do not apply during the heat of the day. Do not apply if turf is under heavy stress from heat or inadequate moisture levels. Do not spray to run-off.

Can be mixed with most commonly used chemicals.

Before mixing with other products, mix a small amount and check for fallout or any adverse reaction.

Always read the product label for rates and safety instructions.

## Minimum Analysis

Potassium (K)  
as carbonate.....41.5% W/V
