POTASSIUM THIOSULPHATE SOLUTION

Product Description

K Response is a highly concentrated form of potassium thiosulphate. This product is compatible with most micronutrient and pesticide mixes and helps unlock tied up trace elements.

K Response helps strengthen turf grass over high stress periods. It is commonly used over the months leading up to hot and dry weather.

K Response is a premium product manufactured from the best available ingredients to ensure the user gets optimum results.

K Response can be used at any time during the growing season on cool, warm or transitional grasses.

- **Compatible with most pesticides.**
- **Suitable for all types of spray equipment.**
- **Potassium in the form of thiosulphate.**
- **Non-abrasive to spray equipment.**
- **Rainfast in 3 hours.**
- **Chloride free.**

Pack sizes: 20lt & 200lt.

Suggested Application Rates

Situation	Rate
General Turf	500-700 mls/100m ²
Standard bowling green 37 x 37m	7.0-9.8 Litres

Comments

Minimum dilution rate 1:100.

Do not apply during the heat of the day. Do not apply if turf is under heavy stress from heat or inadequate moisture levels. Do not spray to run-off.

Can be mixed with most commonly used chemicals.

Before mixing with other products, mix a small amount and check for fallout or any adverse reaction.

Always read the product label for rates and safety instructions.

Minimum Analysis

Potassium (K)	
as thiosulphate.....	30% W/V
Sulphur (S).....	25%W/V
