AMMONIUM NITRATE SOLUTION

Product Description

N Courage is a fast acting Nitrogen source to enhance turf colour and encourage warm season turf varieties out of dormancy. It can be readily mixed with phosphorous and potash solutions. It is a safe, easy to handle form of the traditional granular product. Of the 28% Nitrogen, half (14%) is in the nitrate form, mobile and instantly available. The other half is ammoniacal Nitrogen, which fastens itself to the clay particles in the upper soil layers and stays there. It is then gradually changed by bacterial action to the nitrate form.

N Courage is a premium product manufactured from the best available ingredients to ensure the user gets optimum results.

N Courage can be used at any time during the growing season on cool, warm or transitional grasses.

- Compatible with most pesticides.
- Suitable for all types of spray equipment.
- Nitrogen derived from urea and nitrate.
- Non-abrasive to spray equipment.
- Chloride free.

Pack sizes: 20lt & 200lt.

Suggested Application Rates

Situation	Rate
General Turf	600-800 mls/100m ²
Standard bowling green 37 x 37m	8.4-11.2 Litres

Comments

Minimum dilution rate 1:100.

Do not apply during the heat of the day. Do not apply if turf is under heavy stress from heat or inadequate moisture levels. Do not spray to run-off.

Can be mixed with most commonly used chemicals.

Before mixing with other products, mix a small amount and check for fallout or any adverse reaction.

Always read the product label for rates and safety directions.

Minimum Analysis

Nitrogen (N)
as ammonium.....14% W/V

Nitrogen(N)
as nitrate.....14% W/V
