REFLEX 37N

37-0-0

**CONTROLLED RELEASE LIQUID FOLIAR FERTILISER.
85% NITROGEN AS SLOW RELEASE.**

Product Description

Reflex 37N is an ideal Nitrogen formulation for prolonged green up.

Reflex 37N is a premium product manufactured from the best available ingredients to ensure the user gets optimum results.

Reflex 37N can be used at any time during the growing season on cool, warm or transitional grasses.

Reflex 37N contains 85% slow release nitrogen with an extremely low salt index developed to supplement or replace standard soil fertility programs. Because this product can be used as a foliar nitrogen source, the amount of soil-applied nitrogen can be reduced, thus increasing losses from nitrate leaching and volatilisation.

Reflex 37N is an ideal maintenance product for use all year round.

- **Up to 8 weeks release.**
- **Compatible with most pesticides.**
- **Suitable for all types of spray equipment.**
- **Nitrogen derived from methylene urea.**
- **Non-abrasive to spray equipment.**
- **Chloride free.**

Pack sizes: 20lt & 200lt.

Suggested Application Rates

Situation	Rate
General Turf	300-600 mls/100m ²
Standard bowling green 37 x 37m	4.2-8.4 Litres

Comments

Minimum dilution rate 1:25. Do not apply during the heat of the day. Do not apply if turf is under heavy stress from heat or inadequate moisture levels. Can be applied at up to 1200 mls/100m². Can be mixed with most commonly used chemicals. Before mixing with other products, mix a small amount and check for fallout or any adverse reaction.

Always read the product label for rates and safety instructions.

Minimum Analysis

Total Nitrogen (N).....37% W/V
15% as urea
85% as slowly available
water-soluble nitrogen from methylene urea
