RESURGENCE

14N + 13Fe

LIQUID NITROGEN & IRON SOLUTION

Product Description

Resurgence is a Nitrogen/Iron solution used to enhance turf colour and encourage warm season turf varieties out of dormancy. Nitrogen content assists the Iron by increasing the uptake in turf plants by acting as a carrier, thereby producing a synergistic effect. Nitrogen is also the building block for amino acids, protein and protoplasm. The iron content helps in production of chlorophyll. It also acts as an activator of certain enzymes and to nullify the effect of free oxygen radicals during oxidative stress.

Resurgence is a premium product manufactured from the best available ingredients to ensure the user gets optimum results.

Resurgence can be used at any time during the growing season on cool, warm or transitional grasses.

- Compatible with most pesticides.
- Suitable for all types of spray equipment.
- Nitrogen derived urea.
- Iron derived from sulphate
- Non-abrasive to spray equipment.
- Chloride free.

Pack sizes: 20lt & 200lt.

Suggested Application Rates

Situation	Rate
General Turf	150-300 mls/100m ²
Standard bowling green 37 x 37m	2.1-4.2 Litres

Comments

Minimum dilution rate 1:100.

Do not apply during the heat of the day. Do not apply if turf is under heavy stress from heat or inadequate moisture levels. Do not spray to run-off.

Can be mixed with most commonly used chemicals.

Before mixing with other products, mix a small amount and check for fallout or any adverse reaction.

Always read the product label for rates and safety instructions.

Minimum Analysis

Total Nitrogen (N) as urea.....14% W/V

Total Iron (Fe) as sulphate.....13% W/V
