# HUMAPHOS TRIPLE 6

HUMATE BASED ORGANIC FERTILISER

## Product Description

**Humaphos Triple 6** is a balanced high analysis humate based slow release fertilizer. It has been formulated for turf requiring an extra boost of Nitrogen, Phosphorous and Potassium. This fertilizer utilizes the sustained release properties of organics and mineral phosphate combined with the more soluble forms of Nitrogen and Phosphorous. It is composed of a high-grade natural base with magnesite, mineral phosphate, potassium sulphate, ammonium phosphate, sulphur and trace elements. Therefore it provides a balanced supply of nutrients essential for strong plant growth and turf quality.

**Humaphos Triple 6** is a premium product manufactured from the best available ingredients to ensure the user gets optimum results.

**Humaphos Triple 6** can be used at any time during the growing season on cool, warm or transitional grasses.

**Humaphos Triple 6** can benefit your turf by helping to:

- **Reduce sodium levels**
- **Improve water retention**
- **Stimulate seed germination**
- **Reduce soil compaction**
- **Increase rhizobium activity**
- **Improve water drainage in damp areas**
- **Encourage root development**
- **Add humus to the soil**

**Pack sizes:**  
**25 kg, 1 tonne bulk bag**

## What are Humates?

Humus is derived from the breakdown, under the right bacterial conditions of organic matter, whose origins have come from decomposed vegetation. Humus is a valuable source of Humic Acid. The salts of Humic Acid are known as Humates. It is increasingly recognised that Humates, as the active ingredient in the soils organic matter, play a critical role in the soil's fertility as they hold nutrients and release them over time, as the turf plant requires them.

## Suggested Application Rates

Situation	Rate
Established Turf / Renovation	4 – 15 kg/100m <sup>2</sup>

## Minimum Analysis

<b>Nitrogen (N)</b> .....	<b>6.0% W/W</b>
as ammonium.....	3.0%
as natural organic compound...	3.0%
<b>Phosphorous (P)</b> .....	<b>6.0% W/W</b>
as citrate soluble.....	3.0%
as water soluble.....	3.0%
<b>Potassium (K) total as sulphate..</b>	<b>6.0% W/W</b>
<b>Sulphur (S)</b>	
as natural organic compound.....	9.0%
<b>Calcium(Ca)</b> as carbonate.....	12.0%
<b>Magnesium (Mg)</b> .....	1.2%
