TURFTRACE

LIQUID CHELATED TRACE ELEMENT
SOLUTION

Product Description

Turftrace is a 100% true chelated solution of macro and micro trace elements.

Turftrace can be applied up to 4 times annually. Can be applied monthly to USGA spec greens to improve stress tolerance and colour.

Turftrace is compatible with most micronutrient and pesticide mixes.

Turftrace is a premium product manufactured from the best available ingredients to ensure the user gets optimum results.

Turftrace can be used at any time during the growing season on cool, warm or transitional grasses.

- **Compatible with most pesticides.**
- **Suitable for all types of spray equipment.**
- **Non-abrasive to spray equipment.**
- **Corrects deficiencies.**
- **Foliar of fertigation applications.**

Pack sizes: 20lt & 200lt.

Suggested Application Rates

| Situation | Rate |
|------------------------------------|-----------------------------|
| General Turf | 60-90 mls/100m ² |
| Standard bowling green 37 x 37m | 840 – 1260 Mls |

Comments

Minimum dilution rate 1:100.

Do not apply during the heat of the day.
Do not apply if turf is under heavy stress from heat or inadequate moisture levels.
Do not spray to run-off.

Can be mixed with most commonly used chemicals.

Before mixing with other products, mix a small amount and check for fallout or any adverse reaction.

Always read the product label for rates and safety instructions.
